

## **Bombardier Transportation Wins Large Order: Deutsche Bahn signs frame agreement for delivery of up to 450 locomotives**

- **Delivery of up to 450 locomotives in one frame agreement**
- **Contract volume of up to 1.5 billion euro**
- **First call-off of 130 locomotives**
- **Delivery of vehicles from 2015 until 2023**

**Berlin, June 18, 2013** – Bombardier Transportation and Deutsche Bahn AG (DB) have signed a frame contract for the delivery of electric locomotives. The total potential contract value is up to 1.5 billion euro (\$2 billion US) and includes options for the call-off of up to 450 locomotives by the year 2020. The first call-off of 110 locomotives for DB Schenker Rail and 20 for DB Regio was exercised on June 17, 2013. Based on the list price, the value of 130 locomotives would be 430 million euro (\$573 million US). The frame agreement allows for numerous variations and technical options.

DB's locomotive fleet already includes more than 700 *TRAXX* locomotives that have delivered freight and passenger transport successfully for more than 10 years. The locomotives in the frame contract represent a further development of the *TRAXX* locomotive platform already proven in operation. They fulfil the newest European norms and technical standards.

Thanks to its modular construction and equipment with various country packages, the *TRAXX* platform concept also enables flexible operation in neighbouring European countries. The locomotives are characterized by low life cycle costs and high energy efficiency.

The locomotives are designed for speeds of up to 160 km/h. On request, they can be equipped with "Last Mile" functionality that allows, for example, freight operation of an electric locomotive on non-electrified routes. This increases the efficiency of rail traffic and makes new logistic concepts possible.

### **About Bombardier Transportation**

Bombardier Transportation, a global leader in rail technology, offers the broadest portfolio in the rail industry and delivers innovative products and services that set new standards in sustainable mobility. *BOMBARDIER ECO4* technologies – built on the four cornerstones of energy, efficiency, economy and ecology – conserve energy, protect the environment and help to improve total train performance for operators and passengers. Bombardier Transportation is headquartered in Berlin, Germany, and has a very diverse customer base with products or services in more than 60 countries. It has an installed base of over 100,000 vehicles worldwide.

## **About Bombardier**

Bombardier is the world's only manufacturer of both planes and trains. Looking far ahead while delivering today, Bombardier is evolving mobility worldwide by answering the call for more efficient, sustainable and enjoyable transportation everywhere. Our vehicles, services and, most of all, our employees are what make us a global leader in transportation.

Bombardier is headquartered in Montréal, Canada. Our shares are traded on the Toronto Stock Exchange (BBD) and we are listed on the Dow Jones Sustainability World and North America Indexes. In the fiscal year ended December 31, 2012, we posted revenues of \$16.8 billion.
